

EASTERNSM

WELCOME TO REALSTATUS
The Eastern Way to track your cargo

QUICK START USER'S GUIDE

Getting Started with RealStatus

QuickStart Set Up Guide

Step #1: Use Internet Explorer

Your Browser Makes a Difference:

Eastern's tracking software is optimized for use with Internet Explorer (IE). To achieve full access to all tracking data and navigation features, always log into your RealStatus account using IE as your browser.

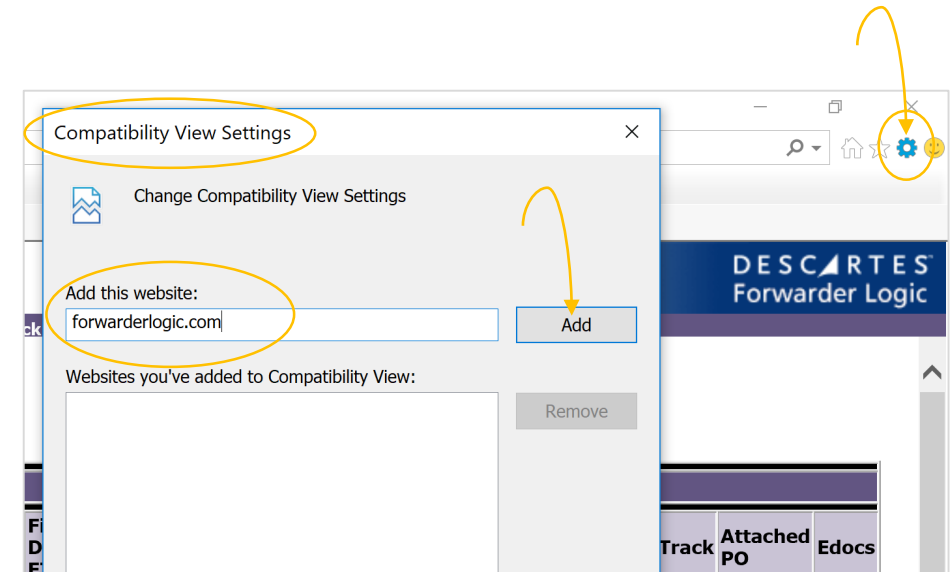

Step #2: Enable Compatibility View

Adjust “Compatibility View” Settings:

From the upper right of your browser screen, click the Gear to access your browser settings. From the drop down menu, choose “Compatibility View”. Then type forwarderlogic.com in the field as shown. Click “Add” and you will automatically see the URL move into the “Websites you’ve added...” field. Then click “Close”.

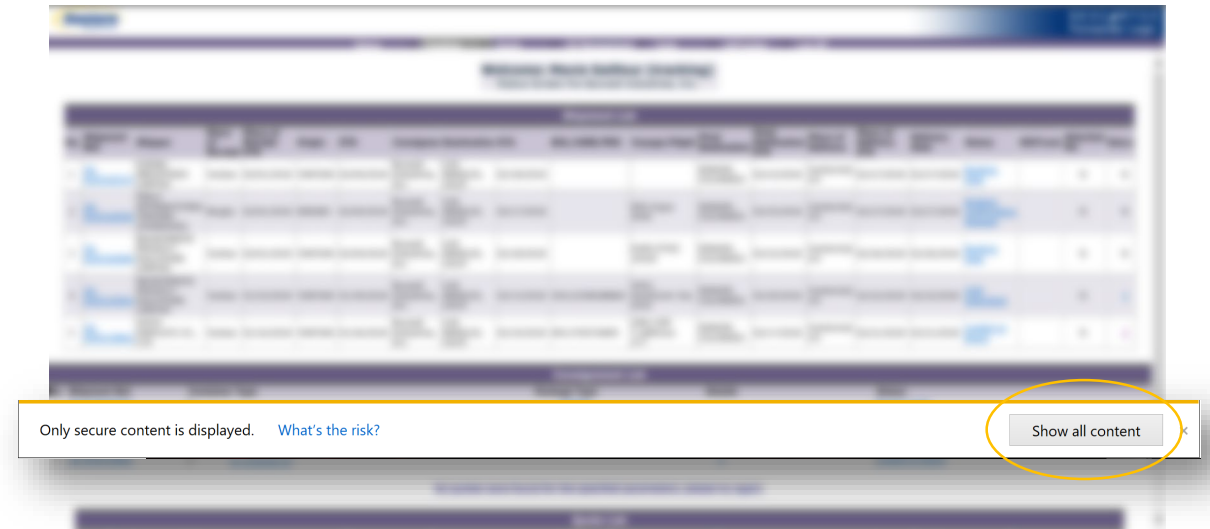

Step #3: Bypass Blockers

Click to “Show All”:

If you have clicked the navigation, but results are not being displayed, be sure to “Allow” any pop-up messages on your screen that would require you to “Show all Content”.

QuickStart: Get Started Now

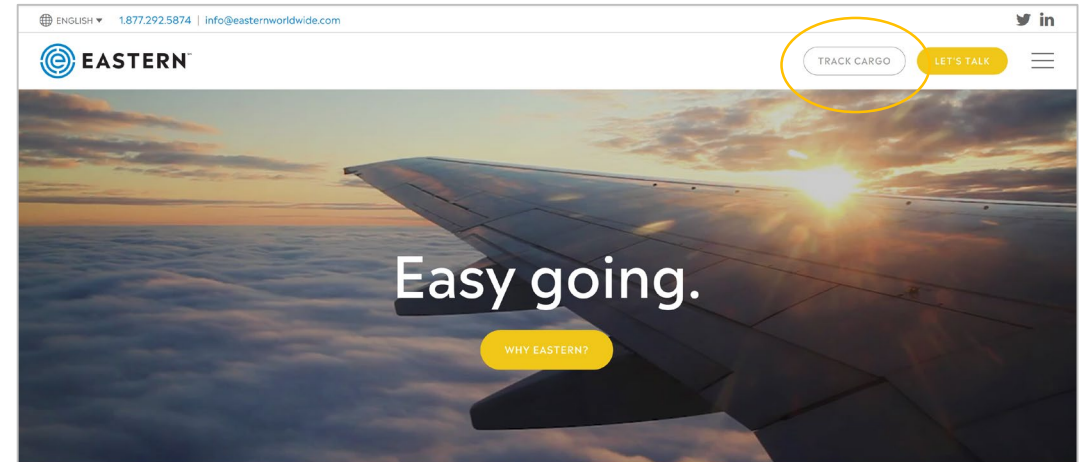

Use Internet Explorer to visit
www.EasternWorldwide.com

Log into your RealStatus Account using the
“Track My Cargo” fields.
